

G.A.J.R.A. Earth

**I Hereby
Invite You To
Be In Global
Association
for Joyful
Responsible
Abundance
on Earth.**

“What Life Would
You Choose If...”

What if we
Gamify
How Money
is Gradually
Replaced
With Joyful
Responsible
Abundance
And..."

Sharing Economy Succeeds

No Waste; Products/Recycled

Cleaned Healthy Environments

Autonomous Travel & Eco-Cities

Most Food Grown@Home by AI

MicroBiome Personal Healer AI

Trustworthy Governance with AI

Climate Change is Galactic Scale

ALPHA

OF INTELLIGENCE

An XR Graphical User Interface to Harness BlockChain,
Big Data, Artificial Intelligence & the Internet of Things
in the Most Trustworthy, Fun & Virtuous Ways Possible.

Build a Local G.A.J.R.A. Aura of Intelligence

Assemble a team via your Aura in the G.A.J.R.A. Game.

Then Play the Game by Accepting or Declining Challenges,
Earning Token Rewards for Multiple Prize Pool Distributions,
+Special Bonus Points for Final Levels with Personification of:

- trinities of good values
 - popular fun activities
 - natural landscapes
- hyper-connected groups
- popular fun characters
- stellar constellations

Plan Locations for Smart City Capsule Hotels

Download The G.A.J.R.A. Game

Install Aura Affinity
App Dependencies

Install G.A.J.R.A.
Game Extension(s)

Play the first 3 acts and earn
a share of the first prize pool

*Play the next 6 acts to earn a
place in the influencer stages*

**Play the next act to compete
for the first Millionaire Auras**

**Play the final act to compete
for unlimited Billionaire Auras**

“Before Simulation Data Creation”

Things to Think About.

Sudden Life Gaming Logical & Rational Considerations

Life Quantification Metrics

- 
- # Thoughts Per Second/Day/Year
 - # Hours Awake/Asleep/Meditating
 - # Hours Hygiene/Beauty/Wellbeing
 - # Years of Pre/Fertility/Post & Parent
 - %Time & # Family/Friends/Colleagues
 - # of Hobbies/Interests/Habits/Hopes
 - # Days Holiday/Rituals/Illness/Injury

Harmonic Resonances

- Energy Frequency, Casual/Urgent
- Love Languages, WA/Q/PT/AS/RG
- Beauty Standards, Body/Mind/Soul
- Sexual Preferences, Genes/Memes
- Personality Types, 9/16 Personalities
- Learning Styles, Visual/Aural/Do/etc.
- Lifestyle Types, Star Charts, Polarity

Millionaire Aura

Can you ethically earn and retain the attention of 1 Million people or more to Heal the World?

- Added in Act 1

- Added in Act 2

- Added in Act 3

What Goes Here Is Up To The General Intelligence
and Values of the G.A.J.R.A. Earth Contestants

- Added in Act 4

- Added in Act 5

- Added in Act 6

Billionaire Aura

Can you ethically earn and retain the attention of 1 Billion people or more to Heal the World?

- Added in Act 4

- Added in Act 5

- Added in Act 6

What Goes Here Is Up To The General Intelligence
and Values of the G.A.J.R.A. Earth Contestants

- Added in Act 7

- Added in Act 8

- Added in Act 9

The Kardashev Scale

Hang on, what do you
mean if Climate Change
is Galactic in Scale...

Isn't it caused by humans?

Game Simulation Context: Solve Any & All
Existential Threats No Matter How Plausible.

Summary

Every civilisation in the modern history or memory of Earth has fallen. Humans only exist on Earth because of many Extinction Level Events since life began here.

The next extinction level cycle of events is approaching and there are at least 3 schools of thought.

1: Climate Change is Human Caused (Naughty Primate's)

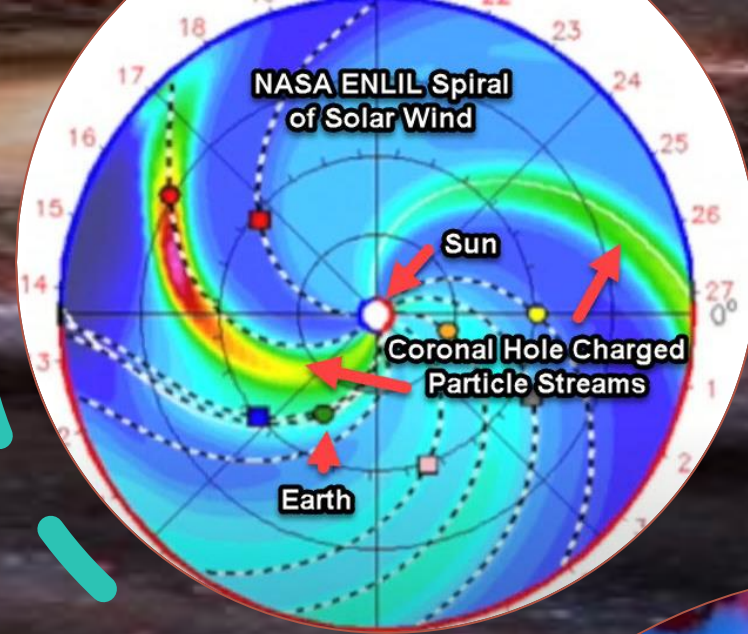

2: Climate Change is a regular 6,000 year polarity flip of the galactic current sheet in our local space environment & takes 12,000 years for the full cycle (positive to negative charge, then back to positive charge). Whereby stars and solar systems are triggered into unstable behaviors. Which this time coincides with our human civilisation pushing many of the Earth environments to their limits, masking the true threat.

3: Galactic Superwave arrives at our star system 26,000 years after the Sagittarius A black hole at the center of the Milky Way Galaxy consumes the X7 Cloudmass.

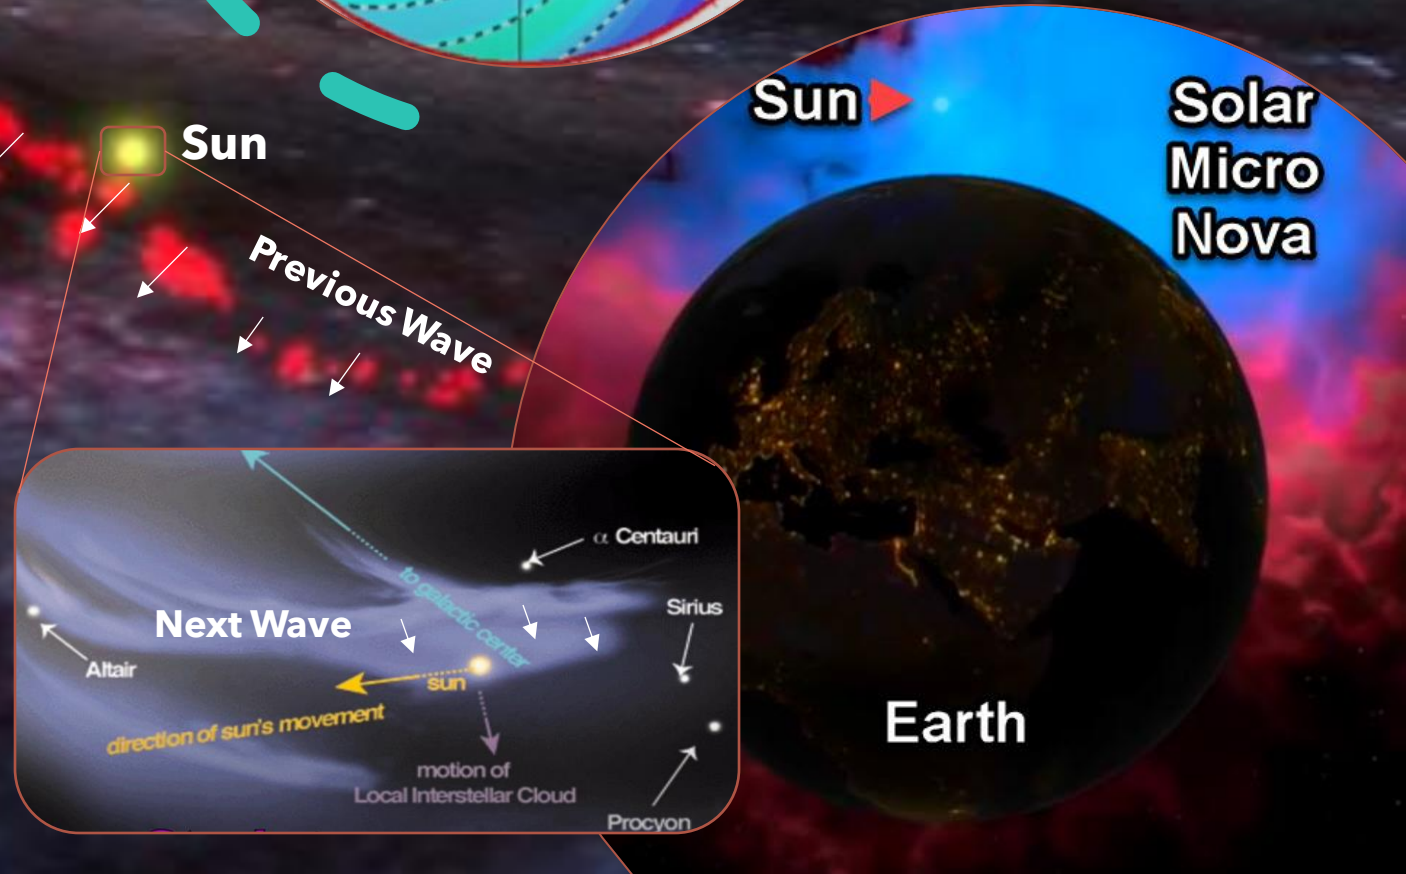

True or not, we will use this in our XR, AGI Game, to create plans for humanity to thrive toward becoming a Kardashev Scale Civilisation.

Galactic long cycles are the source of myth and legend such as, oceans washing over the whole planet, the sun staying still in the sky for days, magnetic polar shifts or total polarity reversal, solar micro nova mega flares that change the atmospheric chemistry, cause the ionosphere to arc discharge to the surface setting off Earth crust displacement that shifts continents in moments, intense plasma lighting of celestial power that makes new surface features such as the Grand Canyon, Ayers Rock, The Eye of the Sahara, Ha Long Bay and likely the most recent being Antarctica. A solar storm strong enough to change the magnetic polarity so much that it ended up as the south pole. A small portion of life survives to repopulate.

Similar processes occur at Sun and Galactic Scale from the Core. When the Galactic Current Sheet streams past the Sun, it gets charged up, then begins releasing bigger than normal outbursts known as Micro Nova.

If It Is Galactic Climate Change We Look For:

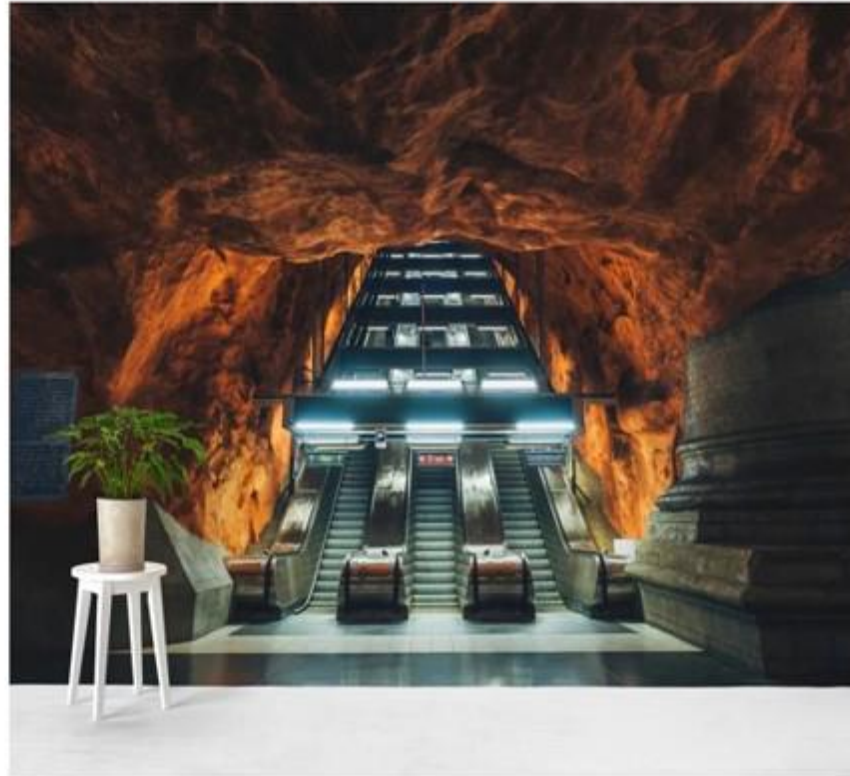

Changes in Our Solar System

- Out of the Ordinary Observations.
 - Planet Rotation+Orbit Variations.
 - Energetic Emissions from Planets.
 - Planet Atmospheric Changes.
 - Increase in Interstellar Objects.
 - Increase in Earth Weather Power.
 - Increase in Magnetic Anomalies.
- 

Nearby Star and Cluster Changes

- Irregular Changes in Brightness.
- Changes in Chemistry Signatures.
- Increased Flares/CME/Micro Nova.
- Irregular High Energy Emissions.
- Changes in Planetary Orbit Times.
- Intelligent Signals from Sentience.
- More interstellar objects seen here.

Responsible Civilisation: Surface, Underground, Space.

Timeline

1

COVID19 Pandemic has caused people to think about what they want in their lives to be happy if they cannot travel.

Take this a step further to think what you need in a new city or in space.

2

We should halt military spending to then invest in civil infrastructure that ensures humanity thrives through and beyond all imaginable Catastrophe.

Doing so we can resolve poverty, waste and war.

3

Earth is a water planet with clear evidence of many past Catastrophes.

We should prioritize all countries to immediately build subterranean cities + clean surface pollution + settle on other worlds.

4

Sun Solar Maximum 25 peaks in 2024 to 2026 and is the highest risk during this decade.

Some Experts predict a 45% chance this is when the sun is triggered by the galactic wave.

5

Sun Solar Maximum 26 peaks in 2035 to 2037.

The same experts have predicted solar cycle 27 to most likely be when the sun will be triggered by the galactic current wave to Micro Nova.

Where Would You Like To Simulate?

Subterranean Earth

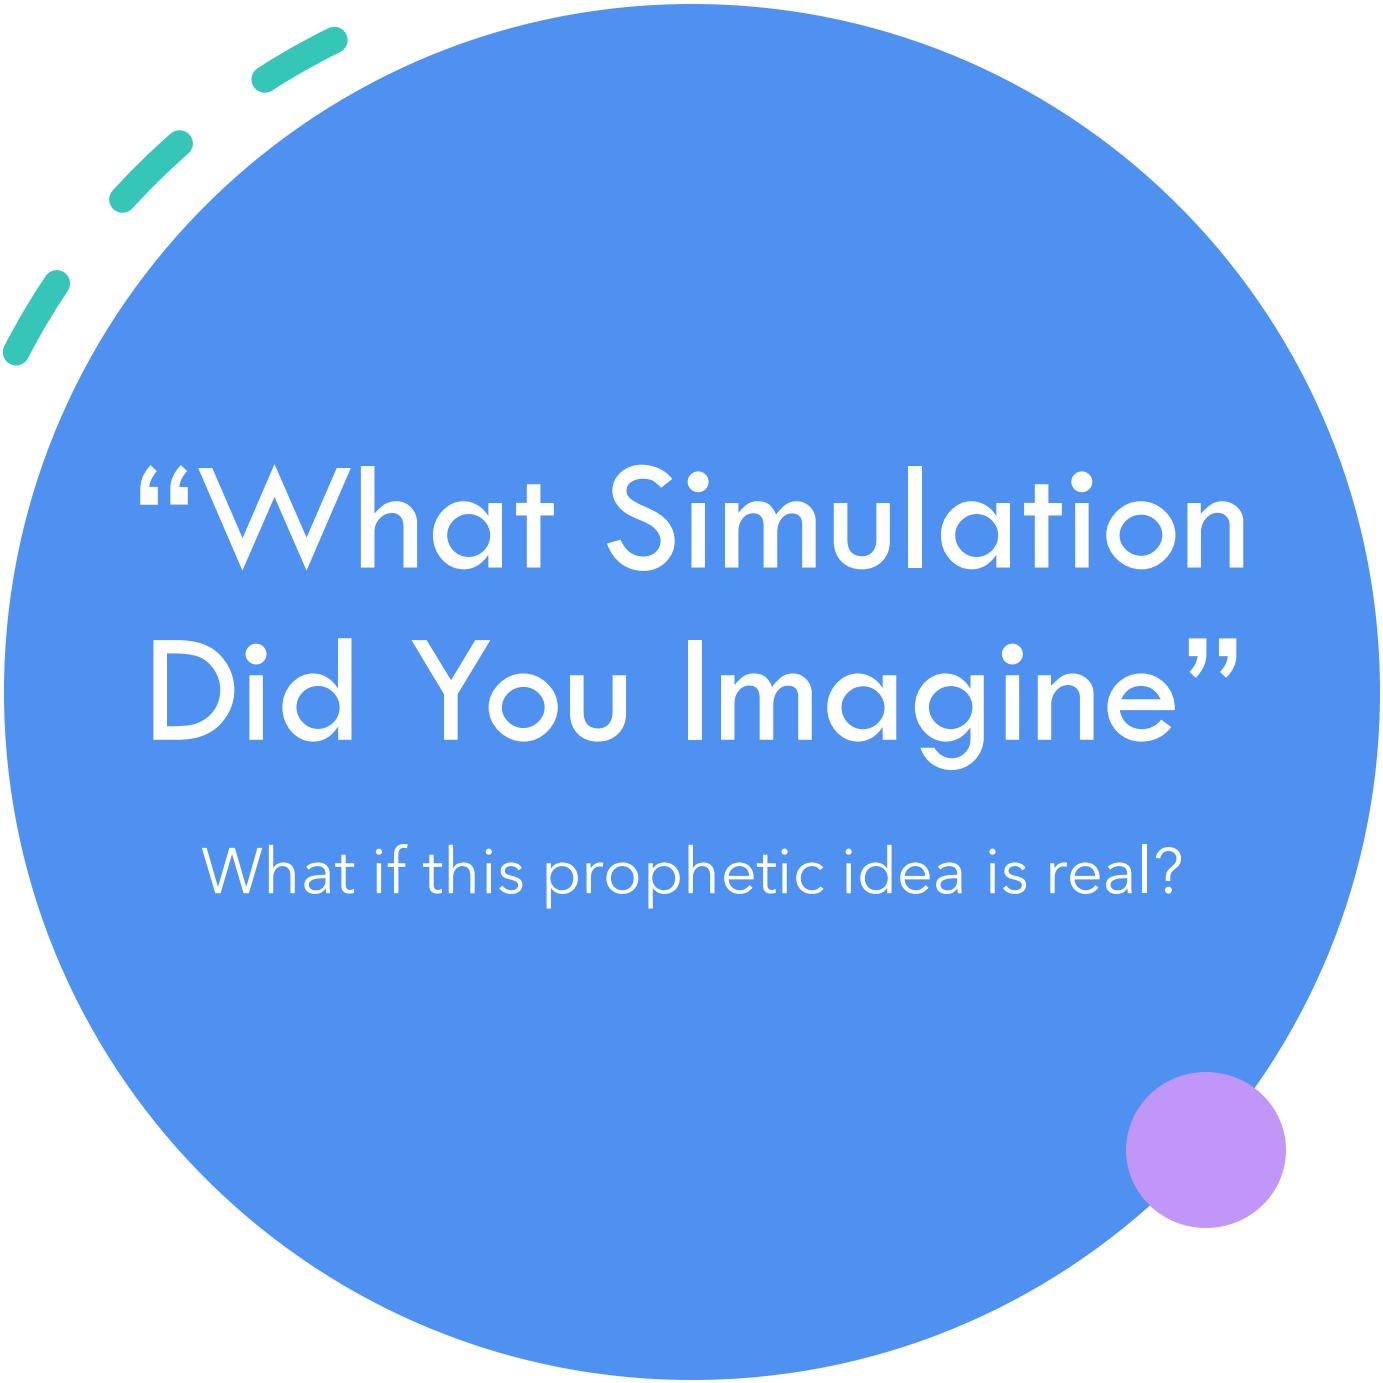

- Subterranean Cities will still use the surface until the very last minute.
 - They will reseed Earth's surface once it is safe.
 - Some continents already have subterranean cities from the last fall of man.
 - Aim to house 10 Billion+ people self-sufficiently in cities of 50,000 or more.
- 

Space Port or Ship

- Near infinite resources are available off world.
- Today's science offers many options if money is not a limiting factor.
- Escaping Earth's "gravity well" is the hardest part but there are options.
- Once in space, radiation shielded ports and ships of vast size are possible.

Waterless World City

- Subterranean + surface cities are options nearby on Mars and Moons.
- Asteroid Belt and outer moons are also options.
- Autonomous robotic mining will be required.
- Subterranean cities on Earth will perfect most systems for A.I. to build off world cities quickly.

“What Simulation Did You Imagine”

What if this prophetic idea is real?
